Project summary:

The project area, the Lika-Senj County, faces economic lag and a lack of gender equality compared to the national average. This project aims to improve the quality of rehabilitation for victims of gender-based violence, raise awareness about gender equality, and ensure collaboration among various stakeholders.

Project results include:

- Support for victims of human rights violations in the Lika-Senj County
- Strengthening inter-sectoral and intra-sectoral collaboration and synergy in the region
- Promoting international human rights standards in the local community
- Supporting the work of civil society organizations (CSOs) and connecting them with citizens and local communities

The project will contribute to increasing awareness of gender equality and women's rights, encourage greater community engagement, and reduce the number of victims of gender-based psychological and physical violence. The added value of the project lies in addressing the challenges specific to the area, where traditional patriarchal patterns of behavior are deeply ingrained, further hindering development.

This project represents a crucial step toward empowering victims, strengthening the community and fostering a more inclusive society in the Lika-Senj County.
